07-Feb-2022

Dear Dr. Giorgi,

Hope you are doing well.

Thank you very much for your positive response to join our journal "**CNS & Neurological Disorders - Drug Targets**" as a Section Editor. I am pleased to inform you that your CV has been approved for the section "**Epilepsy Pathophysiology**". We warmly welcome you to the Board and look forward to the successful collaboration.

You are requested to please provide the following details so we could update your name on our Journal's website.

1-Your complete mailing address and Tel/Fax/Email.

2-Please provide any one or all (if available) of the following details to be uploaded on the Editorial Advisory Board page of the journal. This will help your publication list to get more coverage and ultimately more citations.

Orcid ID:

Scopus Author ID:

Profile and Publication link:

Publication on Pubmed:

Publication on Google Scholar

Any other link of your complete Publications list:

3- As communicated earlier, we need a one-page abstract of the thematic issue with a proposed list of authors (**with respectable h-index (about 15)**) within 4 months of the appointment of each Section Editor for approval of Editor-in-Chief. The complete thematic issue may kindly be sent within 6 months. You are therefore requested to provide a tentative deadline to provide thematic issue Proposal.

4-Your photograph taken in full-face view directly facing the camera.

5-Your brief biography (50-100 words) to be uploaded on our website.

6-Please also suggest a few names in the relevant field suitable for joining the Editorial Board.

7- Please sign and return the enclosed agreement.

Thank you in advance for all your support to help ensure that this journal becomes a great success. I look forward to collaborating with you on this exciting journal.

Please do not hesitate to contact me in case of any query!

Regards,

Ramsha Urooj

Hello Dr Malik,

I hope to find you well. Thanks for the mail. Please find enclosed my CV with the list of publications. My main interest are Epilepsy pathophysiology and Alzheimer's Disease pathophysiology. I would choose one of these two section titles or similar.

I am looking forward to receiving any news from you.

Dear Dr. Giorgi,

Thank you so much for your email and for your positive response.

Your responsibilities, if you accept to join as an editor, would entail soliciting one thematic issue each year for the section. We need a one-page abstract of the thematic issue within 4 months of the appointment of Section editors. We expect to receive a list of authors with respectable h-index (about 15) within 6 months and the complete thematic issue within 9 months. Section Editors are also expected to occasionally solicit/contribute review articles.

You may guest edit an issue yourself or nominate an eminent Guest Editor. The Guest Editor and corresponding authors invited for the thematic issue should all be active and eminent scientists having a respectable H-Index (15 or above). The thematic issue should be in a hot area and should comprise 10 to 14 comprehensive review articles contributed by eminent experts.

The peer review of the articles will be carried out by us without your involvement. After acceptance of the thematic proposal, it will be displayed on the website along with a brief CV of the Section Editor and his/her photograph.

The Section Editor is entitled to the following benefits:

- The name of the Section Editor is displayed on the website of the journal along with the photograph and brief biography.
- Waiver of the Open Access fee is offered for any single article authored by the Section Editor in that thematic issue.
- 3 E-books of choice for each thematic issue published in the Section.
- Free of charge Quick Track publication for the article authored by the Section Editor, if published.
- 50% discount on optional services like publication of color figures, ordering reprints, etc.
- Free Online access of the journal after contribution of the thematic issue.

The Guest Editor (if any) will be entitled to the same benefits.

If you are interested to join us as an Editor, please provide us with a **section title** and **detailed CV** with the **list of publications for Editor-In-Chief consideration**.

Regards,

Ramsha Urooj

CNS & Neurological Disorders Drug Targets

December 20, 2021

Dr. F Giorgi

Department of Translational Research and of New Surgical and Medical Technologies

ITALY

Dear Dr. Giorgi,

This is a Call for Appointment of Section Editors, to the journal "**CNS & Neurological Disorders Drug Targets (CNSNDDT)**, (*Impact Factor 4.388*)". This journal is in its 20th volume and has been abstracted/indexed in all prominent indexing agencies including Science Citation Index Expanded™, SciSearch®, Journal Citation Reports/Science Edition, Scopus etc. The Journal publishes high quality reviews and research papers focusing on hot topics, besides thematic issues in the field of the medicinal chemistry, pharmacology, molecular biology, genomics and biochemistry of contemporary molecular targets involved in neurological and central nervous system (CNS) disorders e.g. disease specific proteins, receptors, enzymes, genes.

Considering your contributions in the field, and based on your published article entitled "**Prolonged epileptic discharges predict seizure recurrence in JME: Insights from prolonged ambulatory EEG**", we feel that your field of interest is related to the field of the journal **CNS & Neurological Disorders - Drug Targets**, and you would be a valuable addition to its Board as a Section Editor. We therefore request your permission to communicate with you further on this matter.

The scope of the "**CNS & Neurological Disorders - Drug Targets**" covers all areas of neurological and central nervous system (CNS) disorders, including, but not limited to:

1. 5-HT and Anxiety
2. 5-HT Receptors and Their Function
3. Acetylcholinesterase Inhibitors
4. Analgesics
5. Anticonvulsants
6. Antidepressants
7. Antipsychotics
8. ATP-Mediated Cytotoxicity
9. Attention Deficit Hyperactivity Disorder
10. Benzodiazepines
11. Bipolar Disorder
12. Blood-Brain Barrier
13. Brain Disorders
14. Brain Hemorrhage

15. Brain-Derived Neurotrophic Factor
16. Brain Signalling Molecules
17. Cannabinoids
18. Clinical Neuroscience
19. CNS Axon Regeneration
20. CNS Diseases
21. Cognitive Neuroscience Section
22. Dementia
23. Depressive Disorders
24. Dopamine and Drug Addiction
25. Dopamine Receptors and Brain Function
26. Epilepsy
27. GABA Receptors
28. Glutamate Receptors
29. Melatonin
30. Metabotropic Glutamate Receptor
31. Migraine
32. Mood Stabilizers
33. Multiple Sclerosis
34. Neurodegenerative Diseases
35. Neurodevelopment
36. Neuroinflammation
37. Neurogenesis
38. Neuronal Nicotinic Receptor
39. Neuropeptide
40. Neuroprotection
41. Neuropsychopharmacology
42. Neurosteroids
43. Neurotoxicity
44. Neurotransmitter
45. Noradrenaline
46. Obsessive-Compulsive Disorder
47. Oxidative Stress and Neurodegenerative Diseases
48. Oxytocin and Eating Disorder
49. Psychotic Disorders

50. Schizophrenia
51. Serotonin
52. Statins and The Brain
53. Therapeutics of Alzheimer's Disease
54. Traumatic Brain Injury

If you feel that this is something that would interest you, please let us know and we will send you further details regarding the role and benefits of the Section Editors.

We look forward to receiving your positive response.

Sincerely,

Q.Malik

Editorial Manager
